

FREE I.T. Health Check

Smooth running I.T. systems are vital to any business and with our FREE I.T. Health Check you can have your systems analysed to ensure that they are running at their optimum and matching your business requirements.

We analyse and produce a report on many aspects of your I.T. Services including:

- Anti-Virus Protection
- Anti-Spyware Protection
- Wired/Wireless Network Security
- Physical Security / Suitability
- Internet Security
- Power Management
- Hardware Suitability
- Operating System Configuration
- Server Loads
- Event Logs Review
- Software Update Services
- Data Encryption Services
- User-level Security
- Client Licensing
- Backup Facilities
- Disaster Recovery Plans
- Drive Integrity
- Email Provision
- Remote Access / VPN Facilities

This service provides real value and genuine benefit to your company. While we provide this service free by way of introducing you to Tectonic, and in the hope that you will decide to use our services in the future, this offer is "string-free" and will involve NO sales pressure.

These checks will be performed, and the report compiled, by highly experienced staff with years of skill in delivering real, expert I.T. solutions to real customers. Our professional experience spans the entire history of desktop PCs and Windows Networks and we have assisted a huge range of customers including SMEs, Public Bodies and Global Corporations.

*Please note: ALL information gathered, reports produced and recommendations made are treated by us as confidential. We value the trust our customers have in us and would never jeopardise that by revealing any information to third parties.
